What does it do?

Yammer is a collaboration tool for small groups that bears more than a striking resemblance to Facebook. It offers a news feed, a place for sharing files, a calendar, polling, and space for collaboratively creating notes. All of this comes with a smartphone app capable of push notifications to keep your students more connected.

Pedagogical uses of Yammer

- Sharing content outside of the classroom
- Promoting collaboration in a way easily understood by students
- Anonymous polling to gauge interest and understanding

How do I get started?

Yammer can be accessed from your Office 365 account, through gsu.edu. The login will use your CampusID & password.

Help resources

Help is available within the Yammer interface itself. Click the ellipse on the far-right of the navigation bar for assistance.
